

GEAR TO TAKE TO CAMBRIDGE

rope: 1km - preference for not 100m lengths of 11mm

120 MRS

50 hangers

30 slings

lots of krabs

A selection of tackle bags - a few big ones (like the Warmbac 100m bags) is nice.

All drill batteries for fettling/testing/correct storage

Makita Drill (one is enough, unless there is known fettling needed)

The 'balancing adapted drill battery charger' (currently at the stone bridge). It does have a label on it saying 'bring back to Cambridge 2016'.

Docs:

Logbook

2015 and 2016 survey folders

bierbook and seshbook

top and bottom-camp call-out books

For training:

At least one setter, pot of hiltis, pot of spits, hammer, hand bolting kit (Wookey's will do)

At least one working compass+clino set, notebook x2, pencil x4, therion protractor x2, SAP and laser tape+pelibox. Preferably the plastic survey box

of all that stuff and the instrument-fettling kit.

Rescue Pulleys

Expo computer kit:

* Expo server (netbook) + sleeve, with PSU,

* plus external drive, with PSU,

* The wifi kit: gadget, aerial with base+cables (as that's Sam's).

* Plus the USB cables holding them together.

* Expo laptop + PSU + neoprene sleeve (unless someone is sure everything has been copied over, and even then having the laptop back to check for 'not-uploaded' files and to upgrade it would be better).

* All fits in Red PVC 'debconf' satchel.

Optional if space: bring back the Bosch drills+batt+charger which really are now retired?

GEAR TO TAKE TO CHRIS IN OXFORD

* System Nicola: black peli case at Steinbrucken
yellow peli case at base
blue box with spare wires at base

* Camping gear: 3 gas stoves
7 Alpinex undersuits
2 Daren drums

* DistoX in grey pelicase - callout box
